

# IMEKO TC-19 INTERNATIONAL WORKSHOP ON Metrology for the Sea

## CALL FOR DEMONSTRATIONS

Università degli Studi  
di Napoli Parthenope

The IMEKO TC-19 MetroSea 2020 Workshop will have "Live Demonstration" track to allow an interactive and tangible form of presentation, which is quite different from the oral and poster sessions. The demonstrations will be conducted in presentation booths and ample space will be provided to set up a working system, may it be interactive software on a laptop or a hardware setup. Conference delegates are invited to experience the demonstrations directly, to interact with, play with, and challenge them. Presenters will have the opportunity to show direct proof of their working systems and to create a lasting impression. Prospective demonstrations could be either be related to the work that has already been published or the one going to be published during the IMEKO TC-19 MetroSea 2020 Workshop.

### DEMO GUIDELINES

Proposals of live demonstrations should submit a one-page description of the demonstration, using the same page formatting as for regular papers. In case of demonstration based on already published work, the paper must include a reference to at least one earlier publication. In addition, there will be a "Best Demonstration Contest" to recognize the top live demonstration and encourage the participation in the demonstration session. The contest winner will receive the "Best Demonstration Award". The one-page demonstration description must contain the following information:

- **Demonstration title and author information:** The title must begin with "Live Demonstration:" and in case of simultaneous paper submission must then cite the title of the full paper.
- **Demonstration setup:** Describe the equipment that you will bring to MetroSea 2020 Workshop. Include a photograph and/or a screenshot. Only a power plug, a table and pin wall will be provided. Demonstrators are responsible for the transportation of their own equipment to the meeting site. Indicate any special requirements such as for example extra space for demonstrating robotic movement or other requirements which the organizers should be aware of. Please ensure that the equipment you bring is safe for delegates to interact with.
- **Visitor experience:** Explain the way in which a visitor experiences and interacts with your demonstration, how it reveals the essence of your work, furthers understanding, and what the visitor will learn.
- **Earlier publication** (for demonstration based on already published work): Please include one or more citations referring to your work about the scientific background of your live demonstration. This reference must be publicly and easily accessible for the reviewers - a URL is highly recommended!

### DEMO PROPOSAL SUBMISSION AND WORKSHOP REGISTRATION

To submit one-page description of the demonstration, authors must register on the MetroSea Conference System, following the guidelines reported at

<http://www.metrosea.org/initial-author-instructions> – Section "Submission of Extended Abstract"

During the submission process, you need to select "Live Demonstration Track".

Prospective demo presenters should register for the conference by following the procedures that are clearly outlined at

<http://www.metrosea.org/registration>

### NAPLES

Naples is noted for its rich history, art, culture and gastronomy and, in the modern day, the historic centre of the city is listed by UNESCO as a World Heritage Site. Naples is a city on the sea, a place full of light yet with dark, hidden foundations. It has a great cultural and artistic identity which is stamped on the brow of its many museums, castles, churches, squares, narrow streets and archaeological remains.
